FORM A2.
BRITISH RAINFALL.

13 JAN 1910

REGISTER OF RAINFALL IN 1909

Kept at Abbeystead Gardens
in the County of Lancashire
by Thomas Wylton

RAIN GAUGE
Pattern Japanned
Diameter of top 8 in.
Height of top above Ground ft. 6 in.
" " " Sea Level 420 ft.

Time of Observation 9 a.m.

Nearest Railway Station
Name Bayhorse
Distance 6 mi Direction West

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909

FORM A2.
BRITISH RAINFALL.

8 JAN 1910

Kept at S. James' Vicarage, Accrington

in the County of Lancaster Cct

by Rev^d A. Spencer

RAIN GAUGE
Pattern Negretti & Gambra
Diameter of top 8 in.
Height of top above Ground 1 ft. 6 in.
" " " Sea Level 475 ft.

Time of Observation 9 a.m.

Nearest Railway Station
Name Accrington
Distance 150 yds Direction S.E.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

FORM A2.
BRITISH RAINFALL.
7 JAN 1911

REGISTER OF RAINFALL IN 1910.

Kept at S. James' Vicarage, Accrington,

in the County of Lancaster

by Revd. A. Spencer.

RAIN GAUGE
Pattern
Diameter of top 8 in.
Height of top above Ground — ft. 18 in.
" " " Sea Level 475 ft.

Time of Observation 9 a.m.

Nearest Railway Station
Name Accrington
Distance 150 yards Direction S.E.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Jan. 1, following.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL.
12 JAN 1911

Kept at Holmfield Aigburth

in the County of Lancashire

by Mary E. Maxwell

RAIN GAUGE
Pattern Snowden
Diameter of top 5 in.
Height of top above Ground 1 ft. - in.
" " " Sea Level 100 ft.

Time of Observation 9. A M.

Nearest Railway Station
Name Mersey Road
Distance 1/2 mile Direction S. W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Jan. 1, following.

REGISTER OF RAINFALL IN 1909

FORM A2. BRITISH RAINFALL.

10 JAN 1910

Kept at Skelwith Fold
in the County of Lancashire
by Cordelia Marshall.

RAIN GAUGE
Pattern
Diameter of top five in.
Height of top above Ground 1 ft. — in.
" " " Sea Level 333 ft.

Time of Observation 9 A.M

Nearest Railway Station
Name Windermere
Distance 7 mls Direction S.E

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

FORM A2.
BRITISH RAINFALL.

3 JAN 1910

REGISTER OF RAINFALL IN 1909

Kept at Aughton Springs Lancashire

in the County of Lancashire

by Cecil. E. Maples

RAIN GAUGE
Pattern Snowdon
Diameter of top 5 in.
Height of top above Ground 1 ft. — in.
" " " Sea Level 137·61 ft.

Time of Observation 9 a.m.

Nearest Railway Station
Name Town Green
Distance 1 mile Direction East

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 191[illegible]

FORM A2.
BRITISH RAINFALL.
10 JAN 1911

Kept at Aughton Springs Ormskirk
in the County of Lancaster 1
by Cecil E. Maples

RAIN GAUGE
Pattern Snowdon
Diameter of top 5 in.
Height of top above Ground 1 ft. 0 in.
" " " Sea Level 137·61 ft.

Time of Observation 9 a m

Nearest Railway Station
Name Town Green
Distance 1 m Direction East

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909

FORM A2. BRITISH RAINFALL.

6 JAN 1910

Kept at Knott Hill Reservoir

in the County of Lancashire Ex Jogg

by John Travis, Waterman

RAIN GAUGE
Pattern Snowdon
Diameter of top 8 in.
Height of top above Ground 1 ft. 3 6 in.
" " " Sea Level 605 ft. 2835

Time of Observation 9 AM.

Nearest Railway Station Ashton under Lyne
Name Fred. J. Dixon
Distance N.E. Direction 1½ Miles

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

BRITISH RAINFALL.
-6 JAN 1910

REGISTER OF RAINFALL IN 1909

Kept at Bailrigg
in the County of Lancashire
by A. L. Storey

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground 1 ft. 3 in.
" " " Sea Level 200 ft.

Time of Observation 9 Am.

Nearest Railway Station
Name Galgate
Distance 1½ mls Direction South

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

FORM A2.
BRITISH RAINFALL.
6 JAN 1911

REGISTER OF RAINFALL IN 1910

Kept at Bailrigg

in the County of Lancashire 4

by H. L. Storey

RAIN GAUGE	Pattern	
	Diameter of top	5 in.
	Height of top above Ground	1 ft. 6 in.
	" " " Sea Level	200 ft.

Time of Observation 9 a.m.

Nearest Railway Station
Name Galgate
Distance 1½ ml. Direction South

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

FORM A2.
BRITISH RAINFALL.

31.VIII.11

REGISTER OF RAINFALL IN 1910

Kept at Beacon Fell (Barnsfold Reservoirs) Fulwood U.D.C. Waterworks.
in the County of Lancashire
by Alfred E. Coupe.

RAIN GAUGE
Pattern Circular
Diameter of top 5 in.
Height of top above Ground 1 ft. 6 in.
" " " Sea Level 506 ft.

Time of Observation 9 am.

Nearest Railway Station
Name Longridge
Distance 4½ m Direction S.E.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Jan. 1, following.

REGISTER OF RAINFALL IN 1909.

FORM A2.
BRITISH RAINFALL.

11 JAN 1910

Kept at Blackpool
in the County of Lancaster
by H. Smith W&P

RAIN GAUGE
Pattern M. O.
Diameter of top 5 in.
Height of top above Ground 1 ft. 0 in.
" " " Sea Level 67 ft.
Time of Observation 9 am.
Nearest Railway Station
Name Bispham
Distance 500 yd. Direction ENE

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

Kept at Belmont Near Bolton
in the County of Lancaster 3
by Bolton Corporation Waterworks

RAIN GAUGE
Pattern Snowdon
Diameter of top 5 in.
Height of top above Ground 1 ft. 0 in.
" " " Sea Level 800 ft.

Time of Observation 9am

Nearest Railway Station
Name
Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Jan. 1, following.

FORM A2.
BRITISH RAINFALL.
22 FEB 1911

REGISTER OF RAINFALL IN 1910

Kept at Heaton, near Bolton

in the County of Lancaster 3

by Bolton Corporation Waterworks

RAIN GAUGE
Pattern Snowdon
Diameter of top 5 in.
Height of top above Ground 1 ft. 0 in.
" " " Sea Level 500 ft. 284

Time of Observation 9am

Nearest Railway Station Name
Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

If Gauge has been moved during year state—

Date.	Distance.	Direction.
not	moved	

How was height above sea level ascertained?

Benchmark & Survey

How many inches of rain will the Gauge hold?

3"

What are the objects nearest to the Gauge?

Objects.	Height.	Distance.	Direction.
no close objects.			

Nearest Parish Church and Railway Station.

	Name.	Distance.	Direction.
Church	St. Peter's	1¾	E
Station	Bolton	2	E

If you know of any records of rainfall not quoted in *British Rainfall*, please mention the Observers' name and address.

REMARKS ON THE YEAR.

Rainfall on the year slightly below the average, the deficiency being chiefly in the early months, and in December. No great amount of damage done to crops in this neighbourhood by shortage owing to the heavy subsoil

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Ex. B.

REGISTER OF RAINFALL IN 1910

Kept at Brindle Rectory
in the County of Lancaster
by Rev. Philip Lancashire

RAIN GAUGE
Pattern Snowdon
Diameter of top 5 in.
Height of top above Ground 1 ft. 3 in.
" " " Sea Level 380 ft.

Time of Observation 9 A.M.

Nearest Railway Station
Name Hoghton
Distance 2¼ Direction N.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910.

FORM A2.
BRITISH RAINFALL.

JAN 1911

Kept at Fleetwood

in the County of Lancaster. 5

by Edward Frobisher

RAIN GAUGE
Pattern Adie's Recording
Diameter of top 8 in.
Height of top above Ground 1 ft. 8 in.
" " " above O.D ~~Sea Level~~ 28·74 ft.

Time of Observation 10 am.

Nearest Railway Station
Name Fleetwood L&Y.
Distance 1/4 mile Direction N.E.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

RE

FORM A2.
BRITISH RAINFALL.
21 JAN 1911

Kept at ~~Garstang~~ (Grizedale Reservoir)

in the County of Lancaster 5

by The Fylde Water Board

n

RAIN GAUGE
Diameter of top 5 in.
Height of top above Ground 1 ft. 0 in.
" " " Sea Level 517.32 ft.

Time of Observation 9 Am

Nearest Railway Station
Name Garstang
Distance 4 Direction ~~Rt~~ NE

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Name
Distance .... Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Distance .... Direction ....

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Kept at Heysham House

in the County of Lancashire

by Miss Tomlinson

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground 1 ft. 6 in.
" " " Sea Level 80 ft.

Time of Observation 9 a.m.

Nearest Railway Station
Name
Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909

FORM A2.
BRITISH RAINFALL.

26 JAN 1910

Kept at Lower Rivington

in the County of Lancashire

by Liverpool Corporation Water Works

RAIN GAUGE
Pattern
Diameter of top 8 in.
Height of top above Ground ft. in.
" " " Sea Level 440 ft.

Time of Observation

Nearest Railway Station
Name
Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909

FORM A2.
BRITISH RAINFALL.
7 JAN 1910

Kept at Walton le Dale Waterworks Brindle

in the County of Lancashire

by S W Elliott

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground ft. 10 in.
" " " Sea Level 316 ft.

Time of Observation 9 a m

Nearest Railway Station
Name Bamber Bridge
Distance 2 miles Direction N W

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2. BRITISH RAINFALL.

5 JAN 1911

Kept at The Walton le Dale waterworks Brindle

in the County of Lancaster

by J W Elliott

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground ft. 10 in.
" " " Sea Level 316 ft.

Time of Observation 9 am

Nearest Railway Station
Name Bamber Bridge
Distance 2 miles Direction N W

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

Kept at Broughton-in-Furness

in the County of N. Lancashire

by C. P. Chambers Esq

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground 1 ft. 3 in.
" " " Sea Level 101 ft.

Time of Observation

Nearest Railway Station
Name
Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909

FORM A2.
BRITISH RAINFALL.
10 JAN 1910

Kept at Carke in Cartmel

in the County of Lancaster

by W R Nash

RAIN GAUGE
Pattern Negretti & Zambra
Diameter of top 5 in.
Height of top above Ground 1 ft. in.
" " " Sea Level 76 ft.

Time of Observation 8 a.m

Nearest Railway Station
Name Carke in Cartmel
Distance 1/3 mile Direction S

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Time of Observation

Nearest Railway Station { Name
Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

FORM A2.
BRITISH RAINFALL.

11 FEB 1910

REGISTER OF RAINFALL IN 1909.

Kept at Barton Moss, Down-holland,

in the County of Lancashire

by Joseph Baxendell, for the Corporation of Southport.

RAIN GAUGE
Pattern Snowdon (copper).
Diameter of top 5 in.
Height of top above Ground 0 ft. 9 in.
" " " Sea Level 14 ft.

Time of Observation 9 a.m. next day.

Nearest Railway Station
Name Mossbridge.
Distance 3/4 mile Direction S by E.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Jan. 1, following. Rule conformed to.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

THE BURY AND DISTRICT JOINT WATER BOARD.

J.W. SMITH,
WATER ENGINEER.
TELEPHONE Nº 132.

PARSONS LANE,
BURY,
LANCASHIRE.

July 8th 1911.

Dear Sir,

I have to acknowledge receipt of your letter of the 7th inst. and agree with you thatthere has been some slight error in filling up the Rainfall Forms for the Scout Moor H.L. Reservoir. However, I herewith enclose copies of the monthly rainfall for 1910 for this district and trust you will find these in order.

Yours faithfully,

Goodhead Smith

Waterworks Engineer.

Dr. H. R. Mills.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL.

- 2 JAN 1911

Kept at Finsthwaite Vicarage

in the County of Lancaster 2

by Revd S. Inman

RAIN GAUGE
Pattern Circular
Diameter of top 8 in.
Height of top above Ground 1 ft. 2 in.
" " " Sea Level 250 ft.

Time of Observation 9 a.m.

Nearest Railway Station
Name Lake Side, W'mere
Distance 1 mile Direction S.E.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground 2 ft. 4 in.
" " " Sea Level ft.

Time of Observation 9 a.m

Nearest Railway Station
Name Grange
Distance ½ m. Direction South

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.
